Vstock Transfer, Launches “Share It”, a unique program to donate a portion of fees from each issuance of a new stock certificate to charity

PR Newswire: New York, New York - VStock Transfer, a leading stock transfer and registrar firm, is pleased to announce a new charitable undertaking whereby it intends to donate to charity a percentage of its revenue made from issuing new common stock certificates to shareholders. VStock Transfer initially intends to run its “Share It” program through the end of the 2015 fiscal year and has selected Urban Dove, a non-profit organization, to make their donation to. Urban Dove's mission is to provide young people, regardless of their economic or social background, the critical skills needed to develop into strong, successful adults who are economically, socially and emotionally independent. The program model uses a combination of academics, life skills, job skills and sports to energize, educate and empower young people in a safe, positive environment of high expectations and shared responsibility.

“We are grateful for the opportunity to be of service to hundreds of companies and to service thousands of shareholders who are buying and selling shares each day. We posed the question to ourselves - What if we could truly have the share certificates that we process allow us to further “share” that activity in a positive way to impact young people?” said Seth Farbman, Chairman of VStock Transfer. “We believe that by donating a percentage of our revenue from processing stock certificate transactions, we can help children focus on developing the critical skills needed for success in life to become leaders in their communities.”

Yoel Goldfeder, CEO of VStock Transfer, commented “Our issuer clients, both private and public, have placed their trust and confidence in VStock Transfer when it comes to having their shareholders invest in their securities. Our VStock Transfer “Share It” program enables us to invest in the future of children who can then have the opportunity to achieve the success all the shareholders receiving the stock are striving for as well.”

For more information on Urban Dove's programs you can visit the non-profit group on their website at www.urbandove.org
